Directions for Scoring:

1. ADD DOWN so that the total number of A answers is written in the box at the bottom of each column. Do the same for the B answers you have checked. Each of the 14 boxes should have a number in it.
2. TRANSFER THE NUMBER in box No. 1 of the answer grid to box No. 1 BELOW the answer grid. Do this for box No. 2

as well. Note, however, that you have TWO numbers for boxes 3 through 8. Bring down the first number for each box beneath the second, as indicated by the arrows. Now add ALL the pairs of numbers and enter the total in the boxes below the answer grid, so each box has only one number. See the example to the right ----

- 3 Now you have four pairs of numbers. Circle/highlight the letter below the larger numbers of each pair. If the two numbers of any pair are equal, then circle/highlight neither, but put a large X below them and then circle/highlight the X.
